For example: on / off alarm, remote start air conditioning system, up / down blinds, closing faucets, gas etc.
- **Programmable call forwarding from the phone terminal**
- **Compatible with analogue PABX lines and ADSL (with microfilters supplied by phone operator)**
- **Allows to simulate the presence in the home, increasing security against possible intrusions.**

# your life easier

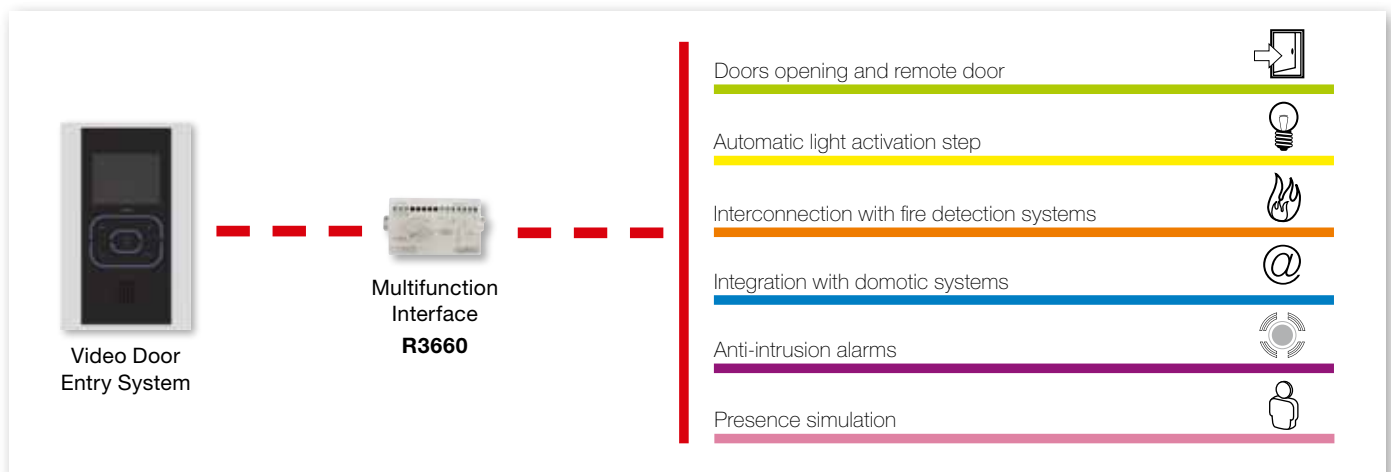

## Multifunction R3660 Interface

Can you imagine also to improve security at home using your video entry system?

**The multi-function interface R3660, allows to incorporate proximity sensors, intrusión, fire, gas...:**

- to issue a call to a mobile or landline phone.
- to issue a call to the monitor of the video door entry system.
- activate the automatic closing of water taps, gas, etc.
- activate sirens, emergency lighting, automatic doors, blinds, etc.

**when these sensors are activated...**

## CI004 Adaptor

“...in addition, also incorporating our adaptor CI004, we can see through the monitor housing, the image emit any security camera located in the building.”
